**Class of retail clients that comprise the target market** The target market is only those persons who satisfy the eligibility requirements to participate as set out above namely:

- (a) existing shareholders of the Issuer who subscribed for Shares under the SPP;
- (b) who were registered holders of Shares as at the Record Date;
- (c) whose registered address was in Australia or New Zealand;

- (d) who is not in the United States nor acting for the account or benefit of a person in the United States or elsewhere outside Australia and New Zealand;

- (f) participants in the Placement, GBA Capital Pty Ltd or directors and management of the Issuer.

- (a) for the \$0.008 Options, five years after the date of issue; and
- (b) for the \$0.02 Options, 30 June 2026,

the Issuer expects that an investment in the Options will be suitable to investors who wish to have the right, but not the obligation, in the medium to long term (being to the relevant expiry date above) to acquire the Issuer's shares.

**Investment timeframe**

The target market of investors will take a medium to long term outlook in relation to their investment in the Issuer, and are in a financial position that is sufficient for them to invest their funds over a time period of up to the relevant expiry date set out above should they wish to exercise their Options.

**Investor suitability metrics**

While the Issuer does not have an established eligibility framework for Investors based on metrics such as employment status, income levels, age or an expected return or volatility, it is expected that the target market of investors will be those investors that wish to obtain optionality for exposure to the Issuer's ongoing operations.

**Risk**

The Issuer considers that an investment in the Options will have a different risk profile to a direct upfront investment in shares, including due to the fact that there is no obligation to exercise the Options. Investors should also have a sufficient level of financial literacy to understand and appreciate the risks of investing in options as an asset class generally and the more specific risks of investing in the Issuer.

The Options are not suitable for investors who do not understand and appreciate the risks of investing in options as an asset class generally and the more specific risks of investing in the Issuer.

The Issuer has assessed the Options and formed the view that the Options, including the key attributes set out in Section 2, is likely to be consistent with the objectives, financial situation and needs of investors in the target market as described above in this Section 3.
