

## TORRENS ELIZABETH CREEK COPPER PROJECT

### HIGHLIGHTS

- **Torrens' farmin partner, Coda Minerals Limited, has today released information about the current drilling program at the Elizabeth Creek Copper Project in South Australia**

Gold and copper explorer Torrens Mining Limited (**ASX: TRN**) (**Torrens** or **the Company**) is pleased to draw to the attention of investors an announcement made today by Coda Minerals Limited which relates to the Elizabeth Creek Copper Project in which Torrens holds a 49% interest.

The announcement released by Coda Minerals Limited is available on the ASX market announcements platform under the ticker code "COD".

This announcement has been approved for release by the Torrens Board.

### ENDS

#### About Torrens

Torrens Mining Limited (ASX: TRN) is an Australian-headquartered company exploring for gold, copper and cobalt and has positioned itself for growth through its assets in the Victorian Goldfields, the advanced and active Elizabeth Creek Copper-Cobalt Project in South Australia and, pending the grant of an exploration licence, at the formerly producing high-grade copper-gold Laloki Project in Papua New Guinea (PNG).

At Mt Piper in Central Victoria, exploration is focused on structurally-controlled gold-antimony mineralisation similar to that being successfully mined at the nearby Fosterville and Costerfield mines. Previous exploration has generated several targets for immediate follow-up, including the Northwood Hill gold prospect. The Club Terrace Project in Eastern Victoria covers some 50km of the Combiobar Fault Zone, where historical mining and exploration activities have generated targets that are yet to be drill-tested.

The Elizabeth Creek Project in South Australia covers an area of approximately 739km<sup>2</sup> in the Olympic Copper Province, which is Australia's most productive copper province. The Company presently holds a 49% interest in this project (further reducing) which is subject to a farm-in agreement with recently ASX-listed Coda Minerals Limited (ASX:COD). Coda is presently funding a drilling campaign now underway.

Subject to an exploration licence application being granted, the Company also intends to explore high-grade copper-gold Volcanogenic Massive Sulphide (VMS) mineralisation at Laloki, located about 15km from Port Moresby, the capital of PNG.

## **Forward-Looking Statements**

This announcement contains “forward-looking statements.” All statements other than those of historical facts included in this announcement are forward-looking statements. Where the Company expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward-looking statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, copper, gold, cobalt and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade or recovery rates from those assumed in mining plans, as well as political and operational risks and governmental regulation and judicial outcomes. The Company does not undertake any obligation to release publicly any revisions to any “forward-looking statement”.
