About Volpara Health Technologies Limited (ASX: VHT)

Volpara Health Technologies makes software to save families from cancer. Healthcare providers use Volpara to better understand cancer risk, empower patients in personal care decisions, and guide recommendations about additional imaging, genetic testing, and other interventions. Our AI-powered image analysis enables radiologists to quantify breast tissue with precision and helps technologists produce mammograms with optimal image quality, positioning, compression, and dose. In an industry facing increasing staffing shortages, our software streamlines operations and provides key performance insights that support continuous quality improvement.

Volpara is the preferred partner of leading healthcare institutions around the world. Our software is used in over 2,000 facilities by more than 5,000 technologists, impacting nearly 15 million patients globally. It helps providers conduct more than three million cancer risk assessments each year and can be deployed stand-alone or fully integrated with electronic health record systems, mammography reporting systems, imaging hardware, and genetic laboratories. Volpara holds the most rigorous security certifications and numerous patents and regulatory registrations, including FDA clearance and CE marking. Since listing on the ASX in April 2016, the Company has raised A$132 million. With an office in Seattle, Volpara is based in Wellington, New Zealand
