# Highlights

---

## Hawsons Iron Project

- More than 50 per cent of the confirmation and definition drilling program in the southern Fold Zone completed.
- Correlation of drilling results with newly reinterpreted ground-magnetic data advanced geological understanding and 3D modelling of the Fold Zone to inform future resource drilling.
- New Exploration Licence (EL9620) granted, increasing the Project's tenement footprint to the south and mine infrastructure planning flexibility.

## Corporate

- Experienced director and former investment banker Jeremy Kirkwood appointed as Chair, with Interim Executive Chair Bryan Granzien resuming his role as Managing Director.
- The Company's Annual General Meeting was held in Brisbane on Tuesday, 28 November 2023, and all resolutions were passed except Resolution 9 – Conditional Spill Resolution - which was not required.
- The Strategic Investor Process to secure funding for the Hawsons Iron Project's Bankable Feasibility Study (BFS) commenced with presentations to selected interested parties in December and continued in January.
- Cash outflows during the quarter totalled \$2.166 million, leaving cash reserves at the end of the quarter standing at \$3.192 million.

# Hawsons Iron Project

---

As announced on 8 August 2023, exploratory drilling during the first half of 2023 identified prospective, near-surface magnetite mineralisation at targeted grades with potential to extend significantly along strike to the south-west.

This drilling program targeted shallower magnetite ore above a depth of 150 metres with a grade greater than 9 per cent Davis Tube Recovery (DTR) mass recovery to help accelerate the project's cash flow during the first few years of operation.

The positive assay results from 10 of 12 Reverse Circulation (RC) holes drilled within an out-cropping area referred to as the Fold Zone to the south of the existing mineral resource warranted further assessment.

An additional 21-hole confirmation and definition drilling program commenced in October to determine the extent, tonnage and grade of the near-surface mineralisation and potential to further improve the Project's economics.

Despite some weather interruptions, equipment issues and challenging ground conditions reflecting the structural complexity of the Fold Zone, 10 of 20 planned RC holes and one twin Diamond Drill core hole were drilled prior to the annual Christmas holiday break.

This program was initially designed to include a mineralised Limb Zone which continues to the south and south-west of the existing mineral resource.

However, further analysis determined that focusing exclusively on the Fold Zone would provide greater certainty for investors and reduce subsequent drilling costs required to complete the BFS.

The confirmed presence of mineable widths of targeted-grade mineralisation above the base of oxidation supports a change in mining strategy to materially shorten the Hawsons Iron Project's ramp-up period to full production.

Significantly, independent geological experts H&S Consultants have been incorporating newly reinterpreted ground magnetic data, initially collected in 2012, into the existing geological model.

This extensive historical ground magnetic data is helping improve the geological interpretation of the Fold Zone and accurately identify areas of higher magnetic intensity, near-surface material for future resource estimation drilling programs.

Importantly, leveraging this historical magnetic data has eliminated the need to conduct costly ground-borne magnetic survey campaigns, while improving the turnaround time to produce 3D magnetic imagery.

The current drilling program has been assessed against the updated model, indicating that all drill holes designed to target the near-surface mineralisation are optimally positioned.

The Company successfully applied to the NSW Government for an additional exploration tenement adjoining its existing lease EL7208.

This new tenement EL9620, granted on 5 December 2023, extends the Project's exploration footprint to the south. It significantly improves mine planning flexibility within the boundaries of a new Mining Lease Area application (MLA641) which was submitted on 18 December 2023. The previous MLA460, covering a smaller area, was withdrawn on 21 December 2023.

## Corporate

---

Experienced director and investment banker Mr Jeremy Kirkwood was appointed as non-executive Chair on 16 October 2023. Mr Bryan Granzien simultaneously resumed his former role as Managing Director after serving as interim Executive Chair since April 2023.

The Company held its AGM in Brisbane on 28 November 2023. Resolutions 1-to-8 were all passed on a poll with the requisite majority of votes at the AGM.

As the votes recorded against Resolution 1 – Remuneration Report – were less than 25 per cent, Resolution 9 – Conditional Spill Resolution - was not required.

Mr Kirkwood and Mr Granzien thanked Shareholders for attending in person and through the webcast of the Company's AGM and for their continued support, trust and confidence.

On 28 November 5,000,000 unlisted Options were issued to Mr Kirkwood pursuant to Shareholder approval at the AGM.

Corporate, investor and community stakeholder relations activities were maintained during the period, including meetings with state and local government representatives, industry participants and Shareholders.

Preparation of a comprehensive investor Information Memorandum (IM) and Data Room was completed during the quarter to support ongoing discussions with potential strategic partners which commenced in December. The IM will be revised as further information becomes available.

## Cash Activities for the Quarter ending 31 December 2023

---

Hawsons Iron Ltd held cash of \$3.192 million at the end of the December 2023 Quarter.

Expenditure was in line with planned operating and Investing activities.

## Payments to related parties of the entity and their associates

65% of Bryan Granzien's gross wages and superannuation was charged and capitalised within the activities outlined in Table 1 at 2.1 (d).

The balance of remuneration remains at item 6.1 of the attached Appendix 5B for Bryan Granzien and 100 per cent for non-executive director fees, totalling \$101,377.

Bryan Granzien Gross Wages	\$32,724
Bryan Granzien Bonus	\$20,000
Bryan Granzien Superannuation	\$2,403
Paul Cholakos Director Fee	\$12,500
Paul Cholakos Superannuation	\$1,375
Tony McGrady Director Fee	\$12,500
Tony McGrady Superannuation	\$1,375
Jeremy Kirkwood Director Fee	\$16,667
Jeremy Kirkwood Superannuation	\$1,833
<b>Total</b>	<b>\$101,377</b>

In relation to Listing Rule: 5.3.2 – There were no substantive mining production and development activities during the quarter. The statement of cash flows for the quarter and financial year to date are attached to this report at Appendix 5B.

## Overview and outlook

Hawsons is in the process of inviting potential strategic partners to consider investing in the Hawsons Iron Project and funding the BFS.

The Company is independent of any major operator in the emerging Green Steel supply chain and seeking investors who share our vision and interest in developing the project to support decarbonisation of the global steel industry.

A supporting Information Memorandum and access to an accompanying Data Room will be made available on a confidential basis to selected parties.

The follow-up confirmation and definition drilling program continues to further define the extent, tonnage and grade of shallow magnetite mineralisation discovered in the Fold Zone south of the existing mineral resource. Wet weather has further delayed drilling in January. It is now unlikely that drilling will re-commence before early February 2024.

Outcomes from this drilling program will need to be included in the database which may extend the timeline for completing the strategic investor selection process.

In December, Hawsons commenced market soundings with potential strategic investors involving presentations on the Project and our selection process.

Feedback from these soundings, which are continuing, will help determine the interest of potential strategic investors in proceeding with the BFS and finalisation of the structure of the process.

Subject to feedback, the Company will then enter a Strategic Investor Process with a smaller group of 'qualified investors' in the March Quarter of 2024.

These parties will be provided with the comprehensive, confidential Information Memorandum. We will then select our preferred partners.

This group, with whom we aim to negotiate final agreements, will be given full due diligence access.

This process is anticipated to take up to six months, with completion targeted in the June Quarter of 2024.

Hawsons completed detailed BFS planning during the quarter, including the timeline and proposed budget. These plans may be amended following discussions with strategic investors in the first half of 2024.

The BFS will commence once Hawsons has secured the necessary funding. Current indications are that the BFS, resource drilling and other program work required to reach a Final Investment Decision will then take a further 18-24 months.
